

ABU BAKAR

Software Engineer | Backend API & System Integrations

Islamabad, Pakistan | +92 314 6554602 | abubakarxdev@gmail.com

linkedin.com/in/abubakarxdev | github.com/abubakarxdev

PROFESSIONAL SUMMARY

Software Engineer specializing in RESTful API development, data transformation, and enterprise system integrations. Expertise in building serverless applications (Next.js, Node.js), relational databases (PostgreSQL), and microservices fundamentals. Proficient in strict Role-Based Access Control (RBAC) and secure authentication (JWT, OAuth2), with a strong track record of debugging complex HTTP/JSON payloads and orchestrating workflows across third-party platforms.

EXPERIENCE

PulseMatrix LLC

Web Developer

Remote (USA)

Sep 2025 – Present

- Developed serverless backend architectures using **Next.js** and **Node.js** to handle integration workflows and REST services.
- Architected database schemas and managed authentication flows utilizing **Supabase** (PostgreSQL, Auth, Storage).
- Automated enterprise workflows by integrating custom web applications with **SharePoint** via **Power Automate** and webhooks.
- Handled deployment and monitoring of web environments, maintaining 99.9% system uptime for a portfolio of 10+ US-based clients.

GHL Success Path

Implementation Specialist

Islamabad, Pakistan

Jan 2026 – Feb 2026

- Integrated third-party systems and automated cross-channel workflows utilizing REST APIs, Webhooks, and data transformation.
- Debugged complex JSON payloads and analyzed system logs to optimize API response times and ensure seamless data synchronization.

Codeaza Technologies

Software Engineer Intern

Rawalpindi, Pakistan

Feb 2025 – Jun 2025

- Engineered a scalable multi-tenant platform serving 12+ chains entirely in **Python (FastAPI)**, optimizing HTTP data flow.
- Developed 20+ RESTful API endpoints with strict RBAC, managing **PostgreSQL** schemas and executing **Alembic** migrations.

KEY PROJECTS

HRMS - Enterprise Human Resource System

Node.js, PostgreSQL, Prisma, React

Multi-Tenant Architecture & API Security

- Engineered a multi-tenant HRIS with strict RBAC, developing RESTful APIs for employee, attendance and leave management.
- Implemented secure user authentication pipelines utilizing **JWT** (Access and Refresh tokens) and **Bcrypt** for robust API security.

NeuroSentinel (Final Year Project)

Python (FastAPI), React.js, TensorFlow

healthcare AI Solution

- Integrated patient management, scheduling, telehealth consultations, RBAC authentication, AES-256 encryption, and Stripe payments using React.js, Node.js, and MongoDB.
- Architected healthcare system with AI detection for 5+ neurological conditions achieving 92% accuracy using MRI/CT analysis via TensorFlow and Python.

BlogApp API Architecture

Python (FastAPI), React.js, PostgreSQL

Full-Stack System Integration

- Built a scalable full-stack platform focusing on secure API design with **JWT** and **OAuth2** authentication protocols.
- Architected the database using **SQLAlchemy** and **PostgreSQL**, integrating Cloudinary APIs for external media storage.

TECHNICAL SKILLS

- Integration & Architecture:** REST APIs, Webhooks, Data Transformation (JSON, XML), Microservices, Serverless Architecture.
- Languages & Frameworks:** Object-Oriented Programming, Node.js, Next.js, React.js (TypeScript/JavaScript), Python (FastAPI), Java.
- Databases & Middleware:** PostgreSQL, Supabase, Prisma ORM, SQLAlchemy, JWT, OAuth2.
- DevOps & Tools:** Git / Version Control, Linux CLI, Power Automate, Postman, API Logging & Debugging.

EDUCATION

COMSATS University Islamabad

Bachelor of Science in Software Engineering

Islamabad, Pakistan

Graduated 2025

- Relevant Coursework:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Database Management Systems, Web Development, Software Architecture.
